"An outstanding feature of life is the capability of living cells to take up substances from the environment and use these materials for the synthesis of their own cellular components or as an energy source."

- **Konrad Mengel and Ernest A. Kirkby,**
Principles of Plant Nutrition

TAPPIN' ROOTS - All Stages

The wild harvested ingredients are handcrafted using ecological sustainable methods. Each batch is processed using no chemicals, giving you a 100% natural a sustainable product.

Tappin' Roots All Stages is a fertilizer made of botanical extracts that are high in micronutrients and are specifically rich in phytohormones. This powerful recipe of natural extracts works synergistically to stimulate and regulate plant growth functions – fine tuning all stages of growth to a higher level of health and vitality. Visible, impressive and 100% natural results can be seen within days of application.

BENEFITS

-  100% Natural and biodegradable
-  Wild crafted by hand in individual batches
-  Promotes Healthy Roots
